

Dear Hiring Manager,

I'm writing to apply for the Website Engineer position at Eleven Labs. Your need for an SEO-focused developer with a passion for audio AI caught my attention, as I've tackled similar challenges in my work developing integrated e-commerce platforms and automated business systems.

I'm a pragmatic full-stack developer who focuses on delivering measurable business impact through technical solutions. I'm particularly strong in data-driven automation and system optimisation with Next.js, Figma, and SQL, having implemented solutions that significantly improved performance and ROI across multiple business contexts.

I'd welcome the opportunity to discuss how my technical expertise could help drive Eleven Labs's success. My CV is attached for your review.

Best regards,

Edward Middleton-Smith
